THE AMERICAN

METEOROLOGICAL JOURNAL.

A Monthly Review of Meteorology.

EDITED BY

ROBERT DE C. WARD,

Assistant in Meteorology, Harvard University, Cambridge, Mass.

ASSOCIATE EDITORS.

MARK W. HARRINGTON, Chief of the United States Weather Bureau.
A. LAWRENCE ROTCH, Proprietor of the Blue Hill Observatory, Massachusetts.
CLEVELAND ABBE, Professor, United States Weather Bureau, Washington, D. C.
WILLIAM M. DAVIS, Professor of Physicial Geography, Harvard University, Cambridge, Mass.
EVERETT HAYDEN, Ensign, United States Navy, retired, Washington, D. C.

VOL. X.

MAY, 1893.—APRIL, 1894.

BOSTON, NEW YORK, CHICAGO, AND LONDON.
GINN & COMPANY.
Publication Office, 7-13 Tremont Place, Boston, Mass., U. S. A.

INDEX.

VOL. X., MAY, 1893 — APRIL, 1894.

The notes and reviews signed by initials in this volume are here indexed under the names of the authors.

ABBE, C., Charts of Storm Frequency, 10; Waldo's Modern Meteorology, 56.
Air in Wells, Currents of, 143.
Air Movements in Cyclones and Anticyclones, 170.
American Association of State Weather Services, 102, 313.
Analysis of the Causes of Rainfall, 274, 400, 444.
Anticyclones, Solar Spots and, 61.
Arabian Sea, Currents of Air over the, 237.
Archibald, E. D., 237, 397.
Are our Winters Becoming Milder? 54.
Arizona, A Cloud-Burst in, 384.
Artificial Rainmaking in Kansas, 357.
Atlas of Scotland, A New, 480.
Atlas of the Indian Ocean, 248.
Atmosphere, Meteorology as the Physics of the, 1, 77.
Australian Burster, 193.
Australian Climate and Weather, 237.
Australia, Rainfall of, 58.
Auroras and Sunspots, 105.

BAILEY, S. I., 433.
Balancing of the Clouds, 185.
Barometer, Diurnal Period of the, on Chachani, 358.
Barroll, H. H., 138.
Barus, C., Cloudy Condensation, 12.
Batchelder, S. F., Isanomalous Temperature Charts, 63, 451.
Bavaria, Thunderstorm Studies in, 436.
Bayard, F. C., 140.
Ben Nevis, Life and Work on, 434.
Ben Nevis Sunshine Values, 191.
Bidwell, S., 49.
Bigelow, F. H., Periodic Terms in Meteorology, 206; Recurrence of Hurricanes, 380.
Birth of a Tornado, 363.
Blanford, H. F., 74, 391.
Blue Hill, Cloud Measurements at, 107.
Blue Hill Meteorological Observations, 445.
Bokhara Typhoon, The, 356.
British Rainfall for 1892, 365.
Brown, W. P., 48.
Buell, A., Hot Winds in Texas, 305.
Burster, Studies of the Australian, 19.

CALIFORNIA, Temperature and Precipitation in, 358.
Cause of Earth Currents, 195.
Causes of Rainfall and Surface Conditions, 274, 400, 444.
Ceylon, Monsoons of, 397.
Chachani, Diurnal Period of the Barometer on, 358.
Charts of Storm Frequency, 10.
Chevalier, S., 327, 356.
Chicago Congress of Meteorology, 92, 222, 312, 316, 398, 481.
Chree, Chas., on Vortices, 246.
Clark, H. M., 235.
Clark, W. B., Climatic Features of Maryland, 420.
Classification of Cloud Forms, 141.
Clayton, H. H., Six and Seven Day Weather Periodicities, 35, 222; Air Movements in Cyclones, 170; The Theory of Cyclones, 321; Thunderstorms in New England, 364.

Clendenin, W. W., Prevailing Winds and Physical Features, 65.
Climate and Weather, Australian, 237.
Climate, Influence of Forests on, 447.
Climate of Greenland, 441.
Climate of Louisiana, 430.
Climate of New South Wales, 136.
Climate of North Carolina, 187.
Climate of Quito, 399.
Climate of Saxony, 237.
Climate of the Coast District of Texas, 155.
Climate of the Interior of Greenland, 126.
Climatic Charts of Maryland, 489.
Climatic Features of Maryland, 420.
Climatic Influence of Forests, 233.
Climatology of the Cotton Plant, 152.
Cline, I. M., Precipitation in Texas, 45.
Cline, J. L., Climate of the Coast District of Texas, 155.
Cloud Burst in Arizona, 384.
Cloud Burst in Tennessee, 361.
Cloud Forms, Classification of, 141.
Cloud Measurements at Blue Hill, 107.
Cloud Observations in Weather Prediction, 479.
Clouds, Balancing of the, 185.
Cloudy Condensation and Dust-Counting, 12.
Cold Wave of January, 1893, at Hong Kong, 138.
Cold Weather Storms of India, 406.
Conger, N. B., 244.
Congress of Meteorology at Chicago, 92, 222, 312, 316, 398, 481.
Connolly, J. L. S., Chart of Equal Annual Temperature Ranges, 505.
Cook, E. H., 141.
Cotton Plant, Climatology of the, 152.
Cronk, C. P., 447.
Currents of Air in Wells, 143.
Currents of Air over Arabian Sea, 237.
Curtis, G. E., Causes of Rainfall, 274, 444; Hinrichs' Rainfall Laws, 522.
Cycle, A Short, in Weather, 51.
Cyclone, A Destructive, 360.
Cyclone Memoirs, No. V., 402.
Cyclones and Anticyclones, Movements of Air in, 170.
Cyclones, A Theory as to the Origin of 103, 240.
Cyclones, The Theory of, 319.
